

Quality Policy

Quality is a fundamental element of Orga's products and services, and it is integral to Orga as a whole, ensuring we are the trusted partner of choice for protecting people, assets, and the environment.

Orga's products are designed and built in accordance with international regulatory and safety standards and they are certified by recognised authorities such as Dekra, Sira, FAA, ABS, TÜV and Intertek. Orga is certified according to the ISO 9001 standards, and our production locations are certified in accordance with ATEX (2014/34/EU) and IECEx regulations based on IEC EN 80079-34.

We are committed to maintain the highest level of quality assurance and control, to deliver high-quality products that meet our customers' expectations.

The main objectives of this policy are to:

- Provide the resources to enable all employees within the scope of their function to contribute to **continuously improve** the management system;
- Ensure the required **product quality** in accordance with **customer requirements** and relevant standards;
- Perform tasks as **efficiently** as possible while striving to achieve the "First Time Right" principle;
- Ensure adequate **training** levels for employees;
- Monitor **customer satisfaction** and ensure our organization functions in a way that keeps our customers satisfied;
- Achieving a good return, thereby **ensuring continuity**.

In addition, annual objectives are set which provide insight into the performance of our company. The objectives together with this policy are evaluated annually during the management review to ensure its effective implementation and continued improvement of our performance.
